*Water is Life*

## EQUITABLE WATER DISTRIBUTION PROGRAMME (2020)

Due to rapid growth of Thika as reported in Kenya Census 2019, water demand exceeds our current production capacity necessitating us to apply equitable water distribution as detailed below, we are also requesting, Thika residents to apply below water saving tips;

### Water Saving Tips to Help in Conservation of Water:

- Do not leave taps dripping. Shut tightly and replace leaking ones.
- Partially fill a sink or basin with water while washing utensils, vegetables or fruits rather than using a running tap by use of a sink stopper. This wash-water can be re-used for cleaning and for watering plants
- Do not leave the water running to waste while brushing teeth, shaving or washing hands
- Wash your motor vehicle using a bucket instead of a hosepipe and also reduce the frequency of washing.
- Use a watering can instead of a hosepipe for your kitchen garden and flowers
- Do not use treated drinking water for irrigation of flower beds and small vegetable patches.
- Reduce the number of toilet flushes per day and consider placing water displacing inserts in the cistern to reduce the amount of flush water.
- Have adequate water storage e.g. plastic tanks for domestic users to store enough water for use until the next supply cycle
- Report any leakages or water pipe bursts outside your premises to Thiwasco using our customer care hotline no 0720 418 444; Thiwasco Facebook Page; Email: [info@thikawater.co.ke](mailto:info@thikawater.co.ke)
- Report in confidence any suspected unmetered, illegal water connection or irregular water use in your neighborhood to 0724285538
